stic

i am almost sure that i had STIC perform an updated sequence search for **USSN 09/020,393**

concerning a peptide of a certain length (possibly 40 amino acids upper length) for a sequence for this case

i canNOT find the hard copy of the search

is there a record of this recent search and can i get a hard copy of it ?

or can you direct where i can get a copy?

otherwise, i will have to re-submit the search

truly sorry for the inconvenience

thanx
